(All non-US orders must be paid with credit card. Sorry, no wire transfers.)

A word about faxing your payment information: While e-mailing credit card numbers is NOT safe, faxing, on the other hand, is quite secure. It's a private phone call, and you are only sending a picture of the data, not the account number itself. Also, our receiving fax machine is in a secure area, not in view of unauthorized persons. You can rest assured that your payment information is held by us in utmost confidence.
